AIKIA.WALLET / FOUNDER INCOME PRICE

Rs 1,500 + GST. Rs 1 lakh a month to the founders.

The fixed price at which the two founders take at least Rs 1 lakh a month from year 2, every cost is covered, and a cafe owner still finds it easy to say yes. Own Google and Apple wallet, no PassKit. October 2026.

Rs 1,500

A MONTH + GST (Rs 18,000 + GST a year). Rs 50 a day. One price for every cafe, every feature.

90 cafes

PAY EVERY COST AND Rs 1 LAKH A MONTH to the founders (Rs 50,000 each). Selling 9 a month, we reach about 98 by month 12.

8 visits

A MONTH PAY FOR IT. At a Rs 200 bill, 8 extra repeat visits a month (one every 4 days) cover the cafe's Rs 1,500.

Finance desk verdict. Rs 1,500 + GST is the price. It is about half of Reelo's Rs 3,250, under 1% of a small cafe's monthly sales, and gives the two founders Rs 1 lakh a month from month 13 at about 90 cafes. For Rs 1 lakh EACH, the price is Rs 2,000 + GST at about 121 cafes, or Rs 1,500 at 183 cafes.

How to read this. Planning numbers, not quotes. Founders' pay is treated as salary, a company cost, so it is paid before profit. Year 1 founders take nothing and the business repays development and launch. Cafe revenue and loyalty effects come from industry blogs and vendor data, not audited studies.

1 / WHAT A CAFE CAN AFFORD

Not costly, not cheap: the cafe owner's view

Fact	Figure	Src
Small neighbourhood cafe, monthly sales	about Rs 2 to 5 lakh (smaller cafes lower; busy specialty cafes higher)	S
Tier-2 cafe break-even sales	about Rs 80,000 to 2 lakh (secondary location), Rs 1.5 to 3.5 lakh (prime)	S
Net profit margin, small cafe	about 5 to 12%	S
Marketing spend, restaurants	about 3 to 6% of sales (5 to 10% when new)	S
Average cappuccino price in India	about Rs 214; tier-2 bills often Rs 100 to 200	S
Loyalty effect (vendor data)	chance a guest returns rises from about 7% to about 30% once enrolled	S

Price + GST a month	Per day	Share of Rs 3 lakh sales	Share of a 4% marketing budget	Extra Rs 200 visits to pay for it	vs Reelo Rs 3,250
Rs 999	Rs 33	0.33%	8%	5	69% less
Rs 1,000	Rs 33	0.33%	8%	5	69% less
Rs 1,299	Rs 43	0.43%	11%	7	60% less
Rs 1,500	Rs 50	0.50%	12%	8	54% less
Rs 1,799	Rs 60	0.60%	15%	9	45% less
Rs 2,000	Rs 67	0.67%	17%	10	38% less
Rs 2,499	Rs 83	0.83%	21%	13	23% less

Where Rs 1,500 lands. Rs 50 a day, half of one percent of a Rs 3 lakh cafe's sales, about one-eighth of a normal marketing budget, and paid back by 8 extra visits a month. That is the line between "cheap" and "costly" for a cafe owner: it is a real business tool, priced like one cup of coffee a day.

2 / THE PRICE LADDER

Cafes needed for the founders' Rs 1 lakh

Fixed costs Rs 16,164 a month (GST-registered, development already repaid in year 1). Each cafe costs about Rs 183 a month to serve and win, plus a 1% collection fee. Founders' pay is a salary the company pays.

Price + GST a month	A year + GST	Left per cafe	Just break even	Rs 1 lakh total (Rs 50k each)	Rs 1 lakh each (Rs 2 lakh)
Rs 999	Rs 11,988	Rs 806	21	145	295
Rs 1,000	Rs 12,000	Rs 807	21	145	295
Rs 1,299	Rs 15,588	Rs 1,103	15	106	216
Rs 1,500	Rs 18,000	Rs 1,302	13	90	183
Rs 1,799	Rs 21,588	Rs 1,598	11	73	136
Rs 2,000	Rs 24,000	Rs 1,797	9	65	121
Rs 2,499	Rs 29,988	Rs 2,291	8	51	95

Reading the ladder

- **At Rs 1,000** the founders' Rs 1 lakh needs 145 cafes: more than a new brand reaches in 12 months at our selling speed.
- **At Rs 1,500** it needs 90 cafes, which 9 new cafes a month reaches by about month 11 or 12.
- **At Rs 2,000** it needs 65 cafes, but the price starts to feel "costly" against a Rs 2 to 5 lakh cafe, and sign-ups slow.
- Above 150 cafes the costs step up (database upgrade and a part-time support person, about Rs 21,000 a month), which is why the Rs 1 lakh-each column jumps.

3 / CASH PLAN

Rs 1,500: founders paid Rs 1 lakh a month from month 13

Development and launch paid upfront (Rs 2,07,000). Founders take nothing in year 1, then Rs 1 lakh a month in total from month 13. 4 in 10 cafes pay the year upfront; 3% of cafes leave each month.

New cafes a month	Cafes at month 12	Cafes at month 24	Surplus in month 13 after founder pay	Cash to keep in hand	Bank at month 36
6 a month	66	111	-Rs 25,627	Rs 2,07,000	Rs 13,64,575
8 a month	87	148	Rs 4,552	Rs 2,07,000	Rs 26,30,401
9 a month	98	167	Rs 19,642	Rs 2,07,000	Rs 33,05,314
12 a month	131	222	Rs 64,910	Rs 2,07,000	Rs 54,56,054

The plan: 9 new cafes a month

Month	Active cafes	Money in	Founder pay	All costs	Cash position
Month 1	9	Rs 72,171	Rs 0	Rs 26,064	-Rs 1,60,893
Month 3	27	Rs 87,495	Rs 0	Rs 27,816	-Rs 48,213
Month 6	52	Rs 1,08,799	Rs 0	Rs 30,331	Rs 1,68,805
Month 9	76	Rs 1,28,242	Rs 0	Rs 32,720	Rs 4,38,686
Month 12	98	Rs 1,45,988	Rs 0	Rs 34,995	Rs 7,56,531
Month 13	105	Rs 1,96,063	Rs 1,00,000	Rs 1,35,619	Rs 8,16,975
Month 15	117	Rs 2,06,695	Rs 1,00,000	Rs 1,36,835	Rs 9,52,063
Month 18	134	Rs 2,21,477	Rs 1,00,000	Rs 1,38,580	Rs 11,87,999
Month 24	167	Rs 2,47,281	Rs 1,00,000	Rs 1,62,816	Rs 16,82,505
Month 30	191	Rs 2,99,658	Rs 1,00,000	Rs 1,65,303	Rs 24,42,899
Month 36	214	Rs 3,17,562	Rs 1,00,000	Rs 1,67,549	Rs 33,05,314

What the founders get. From month 13: Rs 50,000 each, every month, after every cost, with the company still adding cash. At 8 new cafes a month it still just clears. At 6 a month it does not: start founder pay at Rs 70,000 in total and lift it to Rs 1 lakh once the business passes 90 cafes.

4 / IF IT MEANS RS 1 LAKH EACH

Rs 2 lakh a month to the two founders

Option	Cafes needed	What it takes
Rs 1,500 + GST	183	About 17 to 18 new cafes a month in year 1; needs a sales helper or partner channel
Rs 2,000 + GST	121	About 12 new cafes a month; price is still 38% below Reelo but feels premium to small cafes
Rs 1,500 now, Rs 2,000 for new cafes from month 13	about 140 to 160	Founding cafes keep Rs 1,500; reach Rs 2 lakh in year 2 as the mix shifts

Rs 2,000 + GST with Rs 2 lakh founder pay from month 13

New cafes a month	Cafes at month 12	Surplus in month 13 after founder pay	Cash to keep in hand	Bank at month 36
9 a month	98	-Rs 28,604	Rs 2,07,000	Rs 34,43,765
12 a month	131	Rs 33,915	Rs 2,07,000	Rs 64,40,655
15 a month	164	Rs 75,435	Rs 2,07,000	Rs 93,44,544

Personal tax. Paid as salary, Rs 6 to 12 lakh a year per founder is likely to fall within the rebate under the new personal tax regime; confirm with the CA. Salary is a company cost, so it also lowers company tax.

5 / RECOMMENDATION

The price and how to hold it

Item	Decision
Price	Rs 1,500 a month + GST (cafe pays Rs 1,770); Rs 18,000 a year + GST (Rs 21,240). One price, every feature, every cafe.
No negotiation	The same price is printed on the poster, website, proposal and invoice. The only "offer" is the 30-day free trial.
Founding promise	The first 50 cafes keep Rs 1,500 for 2 years, even if the price rises for new cafes.
Founder pay	Nothing in year 1. From month 13: Rs 1 lakh a month in total once active cafes pass 90; Rs 70,000 until then.
Sales target	9 new cafes a month (about 2 a week); 1 in 6 cafes pitched.
Money rules	Keep Rs 2,07,000 in hand before launch plus 3 months of costs as reserve; churn under 3%; review the price after 6 months with real numbers.

The pitch in one line

"Rs 50 a day, less than a coffee. Your card sits in every customer's phone, brings them back, and pays for itself with 8 extra visits a month."

Why not Rs 1,000 or Rs 2,000

- **Rs 1,000** is easy to sell but needs 145 cafes to pay the founders Rs 1 lakh. At 9 a month that is not reached in year 2's first months, so the founders would wait.
- **Rs 2,000** reaches the founders' goal fastest but sits at the edge of what a Rs 2 lakh cafe will spend on one tool, so sign-ups slow and churn rises.
- **Rs 1,500** keeps the founders' goal reachable on a normal selling pace and stays at about half the market leader's price.
