AIKIA.WALLET / PRICING SCENARIO C

Rs 1,000 + GST. One price, no haggling.

One fixed price for every cafe: Rs 1,000 a month or Rs 12,000 a year, plus 18% GST, every feature included, no discounts. What it costs, how many cafes break even, the profit at each size, a 3-year cash plan, and the GST decision that changes the numbers. Own Google and Apple wallet, no PassKit. October 2026.

21 cafes

TO BREAK EVEN every month on running costs. 42 cafes to also repay development and launch in year 1.

Rs 64,503

PROFIT A MONTH before tax with 100 cafes. 145 cafes make Rs 1 lakh a month.

month 7

EVERY RUPEE BACK at 9 new cafes a month, with 4 in 10 cafes paying yearly. Cash to keep in hand: Rs 2,07,000.

Finance desk verdict. Rs 1,000 flat is the best of the three plans for us: the highest money per cafe, the fewest cafes to break even, nothing to negotiate and nothing to explain. It is still 69% below Reelo. Two conditions: GST registration done before the first invoice, and the yearly plan offered first.

Plus GST, registered from day one. The cafe pays Rs 1,180 a month (Rs 14,160 a year); we keep the full Rs 1,000 and claim back the GST on our own imported software. GST-registered cafes claim the Rs 180 back. Cafes on the composition scheme or not registered can't, so for them the real price is Rs 1,180. (For reference: unregistered we would need 22 cafes; quoting Rs 1,000 including GST would push it to 25.)

1 / RESEARCH

Is one fixed Rs 1,000 price right for India?

Finding	What it means for us	Src
One flat plan is easy to explain, sell and forecast, but gives up upsell revenue. Companies that moved from tiers to one plan did it for higher conversion.	Right for launch: one sentence pitch, one invoice, one price on the poster. Add-ons can come later.	S
Indian small businesses compare against the cheapest option and usually ask for special pricing.	A written fixed price with a public "same price for everyone" rule ends the haggle. The answer to a discount request is the yearly plan, not a lower price.	S
Cutting price too far breaks unit economics: one Indian SaaS at Rs 299 got more sign-ups but lost money and moved back to tiers.	Rs 1,000 keeps about Rs 807 per cafe after costs, the healthiest of our three options.	S
Rs 999-style "charm" prices lift consumer sales; no evidence was found for business buyers.	For a cafe owner, "Rs 1,000 a month" and "Rs 12,000 a year" are cleaner and signal a fixed, honest price.	S
Competitors: Reelo Rs 3,250 a month; DotPe about Rs 2,000; global wallet-loyalty tools US$19 to 49 (Rs 1,800 to 4,700).	Rs 1,000 is 69%% below Reelo and below every wallet-loyalty tool found.	S
GST on software is 18%%; service businesses register above Rs 20 lakh a year of turnover.	We register from day one and bill Rs 1,000 + 18%% GST. See section 3.	S

Positioning line. "Rs 1,000 a month plus GST. About Rs 33 a day. Less than one cappuccino. Same price for every cafe, every feature included." No Indian survey of what cafes will pay for this category was found; the first 20 pitches are the test.

2 / THE OFFER AND THE COST

Everything for Rs 1,000

Included for every cafe
Google Wallet and Apple Wallet card in the cafe's brand; Ink, Chrome and Pink metallic tiers
Stamps and free-reward rule, tiers by visits or by spend, unlimited customers
Staff scanner with one-step scan-and-charge; owner dashboard; team logins
Prepaid credit and top-up packs (once the lawyer clears real-money credit), pay codes, Send-a-gift
Offers, scheduled and win-back campaigns, weather-mood messages, geofencing (up to 10 locations)
Monthly report: visits, members, credit loaded and spent; QR standee; onboarding and staff training

Our cost	Rs a month
Platform: hosting, database and backups, Apple, weather licence, GitHub, GST on imports, CA	Rs 12,724
Management and operations (E)	Rs 5,000
Development Rs 1,10,000 + launch Rs 97,000, repaid over 12 months (E)	Rs 17,250
Fixed a month, year 1 / from year 2	**Rs 34,974 / Rs 17,724**
Per cafe: support and hosting, winning the cafe (Rs 1,000 once over 12 months), 1% collection fee (E)	Rs 183 + 1%
What each cafe leaves us (Rs 1,000; the GST goes to the government)	**Rs 807**

3 / THE GST DECISION

Why "Rs 1,000 + GST" is the right way to bill

How we bill	Cafe pays	We keep	Left after cafe costs	Break-even cafes	Year 1 incl. dev	Profit at 100 cafes
Not GST-registered (under Rs 20 lakh a year)	Rs 1,000	Rs 1,000	Rs 807	22	44	Rs 62,943
Registered, Rs 1,000 + 18% GST (cafe pays Rs 1,180)	Rs 1,180	Rs 1,000	Rs 807	21	42	Rs 64,503
Registered, Rs 1,000 including GST	Rs 1,000	Rs 847	Rs 656	25	51	Rs 49,401

- **Our choice: registered, "Rs 1,000 + GST"** (the middle row). We keep the full Rs 1,000, give every cafe a proper GST invoice, and claim back the GST on our imported software (about Rs 1,560 a month).
- **The cafe pays Rs 1,180 a month or Rs 14,160 a year.** GST-registered cafes claim the Rs 180 back as input credit. Small cafes on the composition scheme, or not registered, can't, so for them the price is really Rs 1,180. Say it upfront.
- **Never let it slip to "Rs 1,000 including GST":** that quietly cuts Rs 153 from every cafe every month.
- Below Rs 20 lakh a year (about 167 cafes) registration is voluntary. Registering from day one is the cleaner, more trusted choice; it needs monthly GST returns, which the CA retainer already covers.

> **Ask the CA.** GST registration before the first invoice, the invoice format, the place-of-supply rules if we sell outside Gujarat, and whether cafes will want a GST invoice. These figures are a briefing, not tax advice.

4 / PROFIT

What Rs 1,000 earns at each size

Steady month from year 2. Billing Rs 1,000 + GST; income below is what we keep (GST goes to the government), before company tax at 25.17%.

Cafes	Income a month	Costs a month	Profit before tax	A year	After tax a month	Per founder a month
22	Rs 21,780	Rs 20,197	**Rs 1,583**	Rs 18,992	Rs 1,184	Rs 592
25	Rs 24,750	Rs 20,747	**Rs 4,003**	Rs 48,032	Rs 2,995	Rs 1,498
50	Rs 49,500	Rs 25,331	**Rs 24,169**	Rs 2,90,032	Rs 18,086	Rs 9,043
75	Rs 74,250	Rs 29,914	**Rs 44,336**	Rs 5,32,032	Rs 33,177	Rs 16,588
100	Rs 99,000	Rs 34,497	**Rs 64,503**	Rs 7,74,032	Rs 48,267	Rs 24,134
150	Rs 1,48,500	Rs 43,664	**Rs 1,04,836**	Rs 12,58,032	Rs 78,449	Rs 39,224
166	Rs 1,64,340	Rs 67,597	**Rs 96,743**	Rs 11,60,912	Rs 72,393	Rs 36,196
200	Rs 1,98,000	Rs 73,831	**Rs 1,24,169**	Rs 14,90,032	Rs 92,916	Rs 46,458
300	Rs 2,97,000	Rs 92,164	**Rs 2,04,836**	Rs 24,58,032	Rs 1,53,279	Rs 76,639

- **Break-even at 21 cafes.** Each cafe after that adds about Rs 807 a month.
- **100 cafes**: about Rs 64,503 a month before tax, about Rs 24,134 per founder after tax.
- **Rs 1 lakh profit a month** at about 145 cafes.

5 / CASH PLAN

3 years, with 4 in 10 cafes paying yearly

Monthly break-even is measured on earned income (Rs 1,000 a month per active cafe, however they paid); cash is shown separately. Development and launch paid upfront (Rs 2,07,000). 40% of cafes pay Rs 12,000 upfront for the year; the rest pay Rs 1,000 a month. 3% of monthly cafes leave each month; the same rate applies to yearly renewals. Billed Rs 1,000 + GST; the GST collected goes to the government and is not counted.

New cafes a month	Monthly break-even	Cash to keep in hand	All money back	Year 1 (after upfront)	Year 2	Year 3
6 a month	month 5	Rs 2,07,000	month 10	Rs 0.75 lakh	Rs 8.14 lakh	Rs 11.83 lakh
9 a month	month 4	Rs 2,07,000	month 7	Rs 3.13 lakh	Rs 12.34 lakh	Rs 16.20 lakh
12 a month	month 3	Rs 2,07,000	month 5	Rs 5.51 lakh	Rs 16.12 lakh	Rs 23.09 lakh
15 a month	month 3	Rs 2,07,000	month 4	Rs 7.47 lakh	Rs 20.74 lakh	Rs 28.62 lakh

The plan: 9 new cafes a month

Month	Active cafes	Money in	Costs	Cash position
Month 1	9	Rs 48,114	Rs 26,064	-Rs 1,84,950
Month 2	18	Rs 53,300	Rs 26,948	-Rs 1,58,598
Month 3	27	Rs 58,330	Rs 27,816	-Rs 1,28,084
Month 4	35	Rs 63,209	Rs 28,669	-Rs 93,544
Month 6	52	Rs 72,532	Rs 30,331	-Rs 12,908
Month 9	76	Rs 85,495	Rs 32,720	Rs 1,35,081
Month 12	98	Rs 97,325	Rs 34,995	Rs 3,12,733
Month 13	105	Rs 1,30,709	Rs 35,619	Rs 4,07,822
Month 18	134	Rs 1,47,651	Rs 38,580	Rs 9,26,144
Month 24	167	Rs 1,64,854	Rs 62,816	Rs 15,46,829
Month 36	214	Rs 2,11,708	Rs 67,549	Rs 31,66,863

Why yearly matters. If every cafe paid monthly instead, the cash low point would be Rs 2,35,386 and all money back by month 12. Yearly payers bring the money forward; push the yearly plan first.

Money to keep in hand: Rs 2,07,000, which is just the upfront development and launch: with 4 in 10 cafes paying yearly, cash never dips below it. Add 3 months of running cost as a reserve. If we build the remaining work ourselves (Rs 0 development) it falls by Rs 1.1 lakh.

6 / COMPARISON AND RULES

Rs 1,000 against the earlier plans

Plan	Left per cafe	Break-even cafes	Year 1 incl. dev	Profit at 100 cafes	Cash in hand	Money back
A: Rs 499 / Rs 799 (30% Plus)	Rs 400	41	84	Rs 23,814	Rs 2,64,261	month 16
B: Rs 899 / Rs 1,199 (30% Plus)	Rs 796	21	42	Rs 63,414	Rs 2,35,962	month 12
C: Rs 1,000 flat, all features	Rs 807	21	42	Rs 64,503	Rs 2,35,386	month 12

All three compared on monthly billing only, each priced plus GST, so they are like for like. Scenario C with 40% yearly payers does better, as section 5 shows.

Rules for a fixed price

1. **One price, written everywhere:** "Rs 1,000 a month + GST" on the poster, website, proposal and invoice. "Same price for every cafe."
2. **No discounts, ever.** If a cafe asks, the only answer is the yearly plan and the 30-day free trial.
3. **Yearly first:** Rs 12,000 + GST (Rs 14,160) upfront by UPI or bank transfer. Monthly Rs 1,180 by UPI Autopay.
4. **30-day free trial** with the card live; the trial does the convincing, not the price.
5. **Price lock for the first 50 cafes** for 2 years. This is a promise, not a discount, and costs us nothing now.
6. **Same money rules:** 3 months of running cost in the bank (Rs 48,492), churn under 3%, at least 9 new cafes a month.
7. **Review after 3 months:** if fewer than 1 in 8 pitched cafes sign, test the Rs 899 / Rs 1,199 plan on new cafes; never cut existing ones.
